- English · full professional
- French · basic conversational

EDUCATION

Web Development Immersive

General Assembly
2016

BA Music Technology

University of West London
2008–2011

BA Cultural Anthropology

ELTE & Université Paris-X
2004–2007

Viktor Dorozsmay

Senior Frontend Developer | Vue, TypeScript

EXPERIENCE

Freelance

Mar 2026 – Present

Frontend Developer · Budapest

- Built a Vue 3 website for a University of Luxembourg research project, with client-editable content
- Shipped two music-learning apps: Doremijam, a Vue 3 web app, and Kalimba Tunes, a native iOS app, both with Supabase backends

The49

Contract Senior Frontend Developer · London (remote)

Mar 2022 – Mar 2026

Developed the Vue frontend of an enrolment app for US health insurer Allstate.

Led technical delivery for under-65 products, contributing to a 10x increase in revenue. Stack: TypeScript, Vuex/Pinia, Vite, OIDC auth, Playwright testing, OpenAPI generator, Azure, SonarQube, Dependency-Track.

- Migrated the codebase from Vue 2 to Vue 3 with the Composition API
- Added extension hooks to support custom product behaviour
- Introduced a functional approach to business logic, making parallel cart operations faster and easier to test
- Onboarded and mentored developers; worked closely with non-technical stakeholders

Contract Frontend Developer · London (remote)

Aug 2020 – Mar 2022

Built early-stage products for US insurer National General (later acquired by Allstate) in Vue 2 and TypeScript.

- Developed a sales tool with progressive loading and client-side filtering on top of a slow legacy API
- Built a plan recommender with deep links into third-party enrolment platforms
- Shipped the prototype that later grew into the app of the senior role above

Freelance

Oct 2019 – Jul 2020

Frontend Developer · Budapest

- Built a car insurance marketing site in pre-rendered Preact for National General
- Built a kalimba tab editor in React, with Firebase authentication and a Firestore NoSQL database

ING

Apr 2018 – Sep 2019

Frontend Developer · Brussels

- Rolled out an AngularJS hybrid app for investment portfolios and co-owned its production support, with same-day turnaround on critical fixes
- Built a greenfield private banking hybrid app in Polymer using TDD

Kano Computing

Aug 2016 – Mar 2018

Software Engineer · London

- Developed a visual coding app in Polymer and Blockly
- Integrated gesture recognition for a motion-sensing wand presented at CES
- Built a desktop app in Node and Web Components to share creations online
